Training at Fallsway

- 4 hour training class held the first Tuesday of every month at our Akron location
- Recommended for recertification or refresher courses
- Class includes training videos, powerpoint presentation, group discussions, a written test and a hands on pre-operational inspection
- Training materials are available from multiple industrial powered equipment manufacturers (CAT, Mitsubishi, Jungheinrich)
- Each student receives a certificate of completion and the paperwork to complete the driving portion of operator training at their own facility

Training at your Facility

- Training begins with four hours of classroom instruction
- Recommended for new operators or those who have not been trained recently
- Class includes training videos, powerpoint presentation, group discussions, and a written test
- The classroom work is followed up with hands on training that covers proper pre-operational inspection, the safe operation of an industrial truck, and an evaluation of the operator's driving performance.
- Each student receives test results, certificate of completion, and wallet cards for OSHA identification

Train the Trainer

- One full day of trainer instruction at your facility
- Equip your designated employee with the tools to do all the powered industrial truck training within your facility
- Training materials are available from multiple industrial powered equipment manufacturers (CAT, Mitsubishi, Jungheinrich)
- We provide the latest in safety and operator regulations, pre-operational safety inspections and practical driving tests
- Each trainer receives a packet with a DVD, powerpoint CD, instructor guide (1), student workbooks (25), completion certificates and wallet cards (25)
